DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art (AAPA) in view of Sasuga et al. (6466282).

AAPA discloses a liquid crystal display device, comprising: dual bank type source driver PCBs (210, 220 Fig. 3) installed at top and bottom of a liquid crystal; a gate driver PCB (230 Fig. 3); three separate main PCBs (240, 241, 242 Fig. 3) arranged in a staple-shaped arrangement, wherein the main PCBs include two horizontal main PCBs which have a length more than one half of a liquid crystal panel (see Fig. 3) and a vertical main PCB (240); a timing controller mounted at the vertical main PCB (240); and FPCs (250, 280, 290 Fig. 3) for connecting the main PCBs to the source driver PCBs and gate driver PCB respectively.

AAPA does not disclose the staple shaped main PCBs being a single PCB.

Sasuga, in the same display field, teaches the use of a three pieces staple shaped (u shaped) PCB (col. 18, lines 54-58) and an integral staple shaped PCB (col. 19, lines 12-17).

It would have been obvious to one of ordinary skill in the art to substitute an integral staple shaped main PCB for AAPA's three pieces staple shaped main PCB. This would have been obvious because the control of the fabrication process of the device can be simplified due to the reduction of part number, taught by Sasuga (see col. 19, lines 12-17).

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis-Doon Chow whose telephone number is 703-305-4398. The examiner can normally be reached on 8:30-6:00, Alternate Monday off.
